PROJECT STRUCTURE REPORT
StayBy - accommodation booking application
Generated: 2026-10-23 14:21

1. PROJECT OVERVIEW
StayBy is organized as a full-stack application:
  Backend: Spring Boot REST API in Java, with JPA, PostgreSQL, Spring Security/JWT,
           email, PayHere payments, image uploads, and PDF receipt/refund services.
  Frontend: React and TypeScript application built with Vite, Tailwind CSS, Leaflet,
            React Router, and Lucide icons.

2. TECHNOLOGY SUMMARY
  Backend build: Maven Wrapper (backend/mvnw and backend/mvnw.cmd)
  Backend runtime: Java 21; Spring Boot 4.1.1
  Database: PostgreSQL via Spring Data JPA/Hibernate
  Frontend package manager/build: npm and Vite
  Frontend runtime: React ^19.2.8
  Authentication: Spring Security resource server and JWT service
  Payments: PayHere integration

3. BACKEND ORGANIZATION
  config/   Web and application configuration
  controller/   HTTP REST endpoints grouped by business capability
  dto/   Request and response transfer objects
  entity/   JPA persistence entities and status/role enums
  repository/   Spring Data repository interfaces
  security/   JWT and Spring Security configuration
  service/   Business logic, scheduling, mail, payment, image, and PDF services
  resources/   application.properties and runtime configuration
  test/   Backend application tests

4. FRONTEND ORGANIZATION
  components/   Shared navigation, landing-page, and reusable UI components
  pages/   Traveler, owner, and administrator screens
  services/   HTTP/API service modules by domain
  assets/   Bundled images and SVG assets
  public/   Public favicon and icon resources
  App.tsx   Application routes and top-level composition
  main.tsx   Browser entry point

5. CONFIGURATION AND DATA SAFETY
  Environment-specific secrets are referenced through backend/.env and ${...} placeholders.
  Secret values and passwords are not included in this report.
  Uploaded images, dependency installations, and compiled build output are summarized
  rather than embedded in the PDF.

6. COMPLETE DIRECTORY TREE

File-count notes:
  tracked/application file: 168
